AD5000 LOCKING HARDWARE, MORTISE - DEADBOLT

HARDWARE	INTERIOR / EXTERIOR	COMPONENTS (MORTISE BODY / EXTERIOR / INTERIOR/TRIM)	FUNCTIONALITY / OPTIONS
AD5450P (Office) Deadbolt Cylinder & Thumbturn, with Ladder Pulls			User turns key from outside to lock or unlock door. User operates fixed handle on outside to slide door open. User operates fixed handle inside to slide door closed. User locks door inside by turning thumbturn. User turns thumbturn inside to unlock door. User operates fixed handle on inside to slide door open. Also available with Small Format Interchangeable Core (SFIC) cylinder housing and Full Size Interchangeable Core (FSIC) cylinder housing. Finish: US32D Standard, other finishes available
AD5440I (Privacy) Deadbolt with Indicator & Thumbturn, with Ladder Pulls			User operates fixed handle from outside to slide door open. User operates fixed handle inside to slide door closed. User locks or unlocks door from inside by turning thumbturn, and indicator on outside indicates Occupied (Red) or Vacant (Green). User operates fixed handle from inside to slide door open. Indicator allows unlock from outside in event of emergency. Finish: US32D Standard, other finishes available
AD5440 (Privacy) Deadbolt with Cointurn & Thumbturn, with Ladder Pulls			User operates fixed handle from outside to slide door open. User operates fixed handle inside to slide door closed. User locks or unlocks door from inside by turning thumbturn. User operates fixed handle from inside to slide door open. Coin override allows unlock from outside in event of emergency. Finish: US32D Standard, other finishes available
AD5440SI (Privacy) Deadbolt with SECTIONAL Indicator & Thumbturn, with Ladder Pulls			User operates fixed handle from outside to slide door open. User operates fixed handle inside to slide door closed. User locks or unlocks door from inside by turning thumbturn, and indicator on outside indicates Occupied or Vacant. User operates fixed handle from inside to slide door open. Indicator coin override allows unlock from outside in event of emergency. Also available with Standard Conventional cylinder on exterior. Finish: US32D Standard, other finishes available

AD6000 LOCKING HARDWARE, MORTISE - SELF LATCHING W/ SINGLE ACTION EGRESS

HARDWARE	INTERIOR / EXTERIOR	COMPONENTS (MORTISE BODY / EXTERIOR / INTERIOR/TRIM)	FUNCTIONALITY / OPTIONS
AD6450P (Office) Lever Lock with Cylinder & Thumbturn, with Levers			User turns key from outside to lock or unlock door. User rotates lever from outside to slide door open. User rotates lever from inside to slide door closed. User locks door inside by turning thumbturn. User rotates lever from inside to automatically release lock (single action egress). User slides door open. Also available with Small Format Interchangeable Core (SFIC) cylinder housing and Full Size Interchangeable Core (FSIC) cylinder housing. Finish: US32D Standard, other finishes available
AD6440I (Privacy) Lever Lock with Indicator & Thumbturn, with Levers			User rotates lever from outside to slide door open. User rotates lever from inside to slide door closed. User locks door inside by turning thumbturn. User rotates lever from inside to automatically release lock (single action egress). User slides door open. Indicator allows unlock from outside in event of emergency.
AD6440 (Privacy) Lever Lock with Cointurn Override & Thumbturn, with Levers			User rotates lever from outside to slide door open. User rotates lever from inside to slide door closed. User locks door inside by turning thumbturn. User rotates lever from inside to automatically release lock (single action egress). User slides door open. Coin override allows unlock from outside in event of emergency.
AD6440SI (Privacy) Lever Lock with SECTIONAL indicator & Thumbturn, with Levers			User rotates lever from outside to slide door open. User operates lever inside to slide door closed. User rotates thubmturn to lock outside lever. Indicator on outside shows room is occupied/Vacant. User rotates lever from inside to automatically release lock (single action egress). User slides door open. Also available with Standard Conventional cylinder on exterior. Finish: US32D Standard, other finishes available
AD6010 (Passage) Lever Lock Passage Latch, with Levers			Latchbolt retracted by lever from either side at all times. Inside lever always free for immediate egress.
